Projects

- **Cloud-Based WOTC Data Management System & Secure Database Portal**
  Developed an advanced, customized WOTC (Work Opportunity Tax Credit) form using Fillout and custom code, integrating form submissions with a Supabase database for centralized data management. Configured and managed the database infrastructure and built a secure, custom-coded database portal with authenticated user access and credential-based login. Implemented automated field mapping to dynamically populate form fields with existing database records, enabling efficient data retrieval, updating, and management. Designed the solution to streamline client workflows, improve data accessibility, and maintain secure access to sensitive business records.
- **Enhanced Network Security Using Next-Generation Firewall (NGFW)**
  Designed and configured a secure enterprise network using FortiGate 300E NGFW in a virtual lab. Implemented IPsec and SSL VPNs for secure connectivity and VLAN segmentation to isolate network traffic. Utilized EVE-NG, VMware Fusion, Cisco Virtual Routers and Switches, Wireshark, and FileZilla to simulate, configure, and validate network security.
- **ShiftEase Moving Business Plan | Cloud-Based Relocation Platform**
  Developed a comprehensive business plan for ShiftEase Moving, an online relocation service offering customized packing, transportation, unpacking, and storage solutions. Designed a proposed Microsoft Azure-based platform architecture to support online bookings, customer data management, and automated communication, emphasizing scalability and streamlined digital operations.
- **Cloud Migration Project: On-Premises to Azure**
  Successfully migrated on-premises IT infrastructure to Microsoft Azure, leveraging cloud services to improve scalability, availability, and operational efficiency. Configured cloud resources, migrated workloads and data, and established a centralized cloud environment to support reliable infrastructure management, enhanced accessibility, and future business growth.

Experience

- **Upwork & Fiverr –** *Workflow Automation & Custom Forms Specialist (Freelancer)*
  2024 – Present
  - Develop customized digital solutions, advanced online forms, and secure web portals.
  - Design automated workflows and integrate web applications with databases and third-party services.
  - Develop user-friendly websites, integrate third-party systems, and improve online visibility through SEO.
- **Microsoft Campus Club UAP Society –** President
  2025
  - Led technical events, workshops, and hackathons focused on Azure and AI technologies.
  - Increased student engagement and encouraged technical learning and collaboration.
  - Promoted networking and knowledge sharing through community initiatives.
- **iFindApartment –** Digital Solution Engineer (Remotly)
  2023-2025
  - Manage virtual machines and cloud infrastructure to ensure reliable operations.
  - Develop user-friendly websites, integrate third-party systems, and improve online visibility through SEO.
  - Streamline data collection and automate business workflows to enhance operational efficiency.
  - Configured Microsoft 365 services, including domain addition, email setup & integration with company website.

Accomplishments

- Certified in Information Technology (Computer Operator) From KPITB
- Cisco Certified Network Associate (CCNA) From IMSciences University Peshawar
- Cloud Computing and Networking Certified from Corvit System Peshawar Academy
- Digital Marketing Bootcamp Certified from Atomcamp Islamabad
- Microsoft Certified: Azure Administrator Associate
- Fortinet Certified: Network Security Associate (NSE 1,NSE 2,NSE 3)
- Cloud and Virtualization Concept From VMware IT Academy

Skills

- **Networking (Routing & Switching):** Routing Protocols (Static Routing, RIP, EIGRP, OSPF,)| Route Redistribution| Subnetting and IP Addressing| TCP/IP Protocols and OSI Model| Network Security and Firewalls (ACL, Encryption, VPN), Cisco Networking tools
- **System Administration: Server Administration**: Installation, Configuration, and maintenance of server operating systems| Domain Controller| DNS|ADDS|RDS|DHCP |RDP|IIS| Firewall Configuration

  Tools Expertise: Window server 2016 to onward | macOS | Linux (CentOS & Ubuntu) | Window 10/11
- **Virtualization:** Virtual Machine Management |Virtual Machine Configuration| Hypervisor configuration and optimization| Resource allocation and optimization| Virtual machine migration| Snapshots and cloning| Integration with host operating systems

  Tools Expertise: VMware Workstation| VMware vSphere | ESXI | Microsoft Hyper-V |Oracle Virtual Box
- **Cloud Computing:** Azure Cloud Services, Azure AI, Responsible AI Practices, AWS
- **Other Skills:** Microsoft Office |Microsoft 365 | Supabase | Jotform| Zapier|Mailchimp| Weebly| Wix| WordPress| Meta ADS

Education

- **Bachelor of Science in Information Technology** (CGPA 3.36/4.0) **(2021 - 2025)**
  The University of Agriculture Peshawar (UAP)
